Financial Review.

NEW YORK, July 7.—The Financier says this week: "Last week's official statement of the New York associated banks was disappointing in many respects, chiefly because of the large loss of cash, whereas a more or less important gain had been foreshadowed by the estimates which were based upon the known movements of money during the week. The decrease in loans was not surprising; indeed, it had been expected as the result of canhad been expected as the result of cancellations of loans incident to disburse-ments of interest and dividends which were actively in progress during the

"The cash loss as reported by the statement was \$8,909,000. This was probably partly due to transfers of money from the banks to trust companies, which institutions thus responded nies, which institutions thus responded to the requirements of the new law that made obligatory the holding of 1 per cent—amounting to about \$10,000,000—additional lawful money reserve, as compared with 2 per cent, which was required to be held on the passage of the law last April. General deposits of the banks decreased \$13,273,300. This amount, however, is smaller by two millions than the sum of the centraction of \$6,366,800 in loans and the decrease in cash, and therefore the statecrease in cash, and therefore the state-ment made an unusually bad proof.

ment made an unusually bad proof.

"The required reserve was reduced by \$3,318,325 as the result of the decrease in deposits; deducting this item from the loss of cash left \$,590,675 as the reduction in surplus reserve to \$6,465,075. Computed upon the basis of deposits, less those of \$15,344,600 public funds, the surplus is \$10,301,225. Loans were decreased \$14,234,000, against \$7,327,900 in the previous week. The daily average of bank clearings for the five days of the bank week was \$374,000,000, against \$302,000,000 in the previous week. Clearings of Saturday, reflecting Friday's business, were \$347,reflecting Friday's business, were \$347640.731. Oats were down 140%. Provisions were 2½ to 12½c higher.

The bearish feeling that prevailed throughout the entire session was due chiefly to the absence of rain in the greater part of the wheat growing sections. Other factors that contributed to the weak tone were a decline at Liverpool and a probability of an increase in the movement of the new wheat crop as shown by liberal acceptances of bids sent out by cash houses. Selling was general during the day and the only support for the market came from shorts. In the last half of the session the market became steady the session the market became steady on buying, caused by reports of sales for export. The demand, however, was not sufficiently lively to prevent anoth-er decline, prices at the close being al-most at the lowest point.
